Teledyne Tekmars representation (TOC instrument line) in Germany through ANTEC GmbH

Dear Kevin:

We are greatly satisfied with the TOC instruments provided by Teledyne Tekmar. This includes the instrument quality as well as the quality of the software. The instruments are well designed in regards to operation on a daily basis, service and preventive maintenance. Our customers appreciate the automatization of steps that are usually required to do by hand like the intellidilution and the auto calibration function. Teledyne Tekmar keeps a close look on the requirements on the different industries and applications and provides beside the instrument and its components valuable tools like application notes, validation support manuals, cleaning validation support manuals etc. When contacting customer support, we promptly get information and help. Orders will immediately being handled and will be sent out quickly.

Kind regards,
Mit freundlichem Gruß,

Christoph Braun
